New Milwaukee® M18™ ONE-KEY™ LED Remote Stand Light Provides High Definition Adjustable Lighting for Utility Industry

Milwaukee Tool continues to deliver unprecedented innovation for the utility industry with the introduction of the new M18™ ONE-KEY™ LED Remote Stand Light.

BUILT TO PROVIDE UNMATCHED PERFORMANCE, RUN TIME AND INGRESS PROTECTION IDEAL FOR LINEMEN DURING OUTAGES, THE NEW STAND LIGHT HAS A THREE-STAGE ADJUSTABLE LEG DESIGN TO GIVE USERS MULTIPLE SET-UP OPTIONS AND CAN BE ADJUSTED TO A HEIGHT OF 1.65 M IN MERE SECONDS. CAPABLE OF RUNNING OFF ONE OR TWO BATTERY PACKS, IT DELIVERS 5,400 LUMENS OF TRUEVIEW™ HIGH DEFINITION LIGHT.

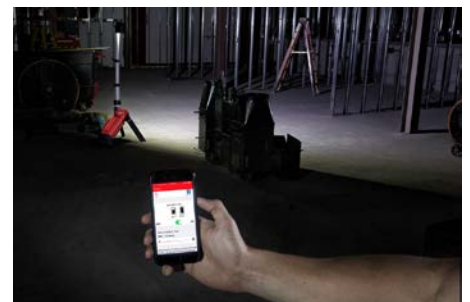

“
The three-stage adjustable leg design gives users multiple set-up options and can be adjusted from 0.5 m to 1.65 m in mere seconds.”

“Adjustable to a max height of 1.65 m, collapsible to a length of 0.5 m, and equipped with 3 different leg deployment options, the M18™ LED Remote Stand Light with ONE-KEY™ truly sets the bar for versatility, whether you are working overhead or underground on utilities. This light essentially provides users with an extremely portable 3-in-1 solution for task, area and elevated lighting depending on the application. For instance, when setup as a tripod it is ideal for situations where elevated lighting is necessary, such as work on utility lines,” said Sendi Spoljaric, Group Product Manager for Milwaukee Tool. “Once the light is set up, its dual battery design and run time customisation features through ONE-KEY™ give users ultimate peace of mind that they’ll never be left in the dark.”

Through ONE-KEY™, users are able to customise, track and manage their new Stand Light and use their phone to control the light. With the ability to completely control its operation from their phone, users simply set the light and won't need to access it again until moving it to the next job. From a 30 m range, they can set the run time which will adjust the output to give them constant illumination for the job at hand, and check the remaining battery charge to know when it's time to change out the batteries.

The ONE-KEY™ *Integrated Tool Tracking* functionality allows users to identify where and when their light was last seen. Records and locations will update when any device with the ONE-KEY™ app comes within 30 m of the Stand Light, allowing the user to quickly pinpoint missing lights. *Integrated Tool Security* provides an extra layer of protection to prevent theft and tampering. With *Simplified Tool and Equipment Management*, users also have a central place to take inventory of their Stand Light and all other tools and equipment, and keep detailed records of all inventory to easily build a budget and manage spend.

The Stand Light features TRUEVIEW™ Technology, which utilises the most advanced LED technology and optical designs to deliver a consistent beam, optimised color temperature and true representation of colors and detail leading to a more productive work area.

Built to thrive in the toughest conditions, the Stand Light features a durable high-impact polycarbonate lens that delivers superior impact durability, and is IP67 ingress protected from dust and waterproof up to 1 meter. A sealed battery box ensures batteries are kept dry at all times.

From the power plant, through transmission and distribution, it is Milwaukee[®]'s goal to improve productivity, reliability and safety for Linemen by offering performance-driven, cordless solutions on one battery platform. Powered by Milwaukee[®] REDLITHIUM-ION[™] batteries, the new M18[™] LED Remote Stand Light with ONE-KEY[™] has a run time up to 26 hours** and is compatible with the M18[™] cordless system, now offering more than 100 power tool products.

***ONE-KEY**[™] is the first digital platform for tools and equipment. By integrating industry-leading tool electronics with a custom-built cloud based program, ONE-KEY[™] provides a new level of control and access to information that revolutionises the way work gets done. The ability to customise, track, and manage through ONE-KEY[™] fundamentally changes the way users interact with their tools.

***when equipped with two M18[™] REDLITHIUM-ION[™] HIGH DEMAND[™] 9.0 Ah battery pack*

Specifications

M18[™] ONE-KEY[™] LED Remote Stand Light (M18 ONERSAL-0)

- 5400 Lumens on High (max. 7 hours of run time)
- 3100 Lumens on Medium (max. 12.5 hours of run time)
- 1600 Lumens on Low (max. 26 hours of run time)
- Extension Height : 1.65 m
- Weight with battery pack : 9.1 kg
- IP67 rated: Water and dust proof

** Available as a bare unit only*

NOTES TO EDITORS

Milwaukee[®] Tool is an industry-leading manufacturer of heavy-duty power tools, accessories and hand tools for professional users worldwide. Since the company began in 1924, Milwaukee[®] Tool has led the industry in both durability and performance. With an unwavering commitment to the trades, Milwaukee[®] continues to lead with a focus on providing innovative, trade-specific solutions.

MILWAUKEE[®] QUALITY

Quality is our highest priority. Starting with an understanding of the professional power tool user's needs, quality is shaped through the design of superior products, components and processes and is extended through the use of high-grade materials, supplies and stringent in-house/field testing.

The process is completed with the delivery of heavy-duty power tools and accessories that professional users need and demand. Quality has built Milwaukee[®]'s reputation since 1924, and continues to be the driving force behind its growth.
