SERIOUSLY.**

By designing cordless tools without compromise, and creating a range of PPE designed around user needs, at MILWAUKEE®, we're making the jobsite safer and more productive every day.

Today, we're proud to boast over 190 Cordless Tools on our M18 platform and over 90 Cordless Tools on our M12 platform, eliminating trip hazards from the jobsite. We've redefined the light equipment market with the launch of our MX Fuel range, preventing the need for petrol on the jobsite with the launch of key tools including the 14" Cut Off Saw, and Cordless Breaker.

Personal Protective Equipment has seen little innovation over the years, driving users to modify their gear to better meet their needs. By taking time to understand our users' needs, we have developed PPE from the ground up, enabling users to adapt to each job. This has paved the way for innovative solutions such as our new safety glasses that can be worn all day with lasting, fog-free lenses.

MILWAUKEE® is committed to creating innovative solutions that help users stay safe and stay productive on the jobsite.

GLOVE SIZING CHART

The correct fitting of work gloves is extremely important. Too big or too small and it can result in an uncomfortable fit. This in turn can result in hand fatigue and ultimately it could lead to a potential workplace hazard.

To minimise hand fatigue and possible workplace hazards, measure your hand to find the correct size of Milwaukee® glove for you.
