DIGITAL INVENTORY

TOOL TRACKING

CONNECTED TOOLS

DIGITAL INVENTORY

ONE-KEY™ lets you manage your assets from your computer, tablet, or smartphone. On the jobsite, in the office - access your inventory, wherever you go with our cloud-based solution.

THE INVENTORY DASHBOARD:

- Helps you draw quick insight
- Smart filters display essential information like recent transfers from jobsites

ITEM DETAIL:

- Seamlessly manage details
- Increase accountability across jobs with visibility of tools
- Know where the tools are assigned to

TOOL HISTORY:

- Build a digital breadcrumb trail with accessible history of when, where and how your tools have been used

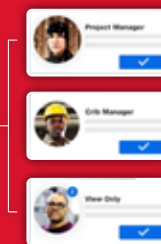

SERVICE REMINDER:

- Set service reminders on your equipment and ONE-KEY™ will notify you when attention is needed

CREW MANAGEMENT

MULTI-USER

- Invite employees to your account and let them manage your equipment and inventory
- Integrated role assignments decide what they'll have access to
- Import contacts from your phone book or add new ones to a virtual address book
- Call, text, or email people right from the app

PLACES MANAGEMENT

- Manage your inventory based on where it is stored
- Quick access of all your jobs in one clean view
- Visualise what's on-hand to cut back on hoarding, or get something where it needs to be
- Audit anywhere, the quickest way to verify what you have on-hand
- Transfers, fill a shopping cart of items to send to a site, auto-generate a pick-list for accountability

TOOL TRACKING

With community Bluetooth® tracking, barcode scanning, and geo-fencing, staying on top of your tools and equipment is easy. ONE-KEY™ shows the last seen location of your connected tools. Mark one missing and our network, made up of hundreds of thousands, helps find it.

TICK™ Tool and Equipment Tracker
Versatile Bluetooth® tracker that can be attached with glue, screws, rivets or straps on anything. It provides location updates (last seen date, time and location) when it comes within a 30 m range of any phone with the ONE-KEY™ App.

*The Bluetooth® word mark and logos are registered trademarks owned by Bluetooth SIG, Inc., and any use of such marks by (TTI corporate name) is under license. Other trademarks and trade names are those of their respective owners.

CONNECTED TOOLS

- Track and lock tools, remote tool lockout makes stolen tools useless to thieves
- Dial in performance, set up your tools for the work you do
- Utilisation data, verify that tools are performing tasks to specification
- Ultimate control, maximise tool performance and accessory life
- Reporting, generate detailed reports on how your equipment is performing and send them to anyone that needs to know

NEW FUEL™

PERFORMANCE DRIVEN REDESIGN.

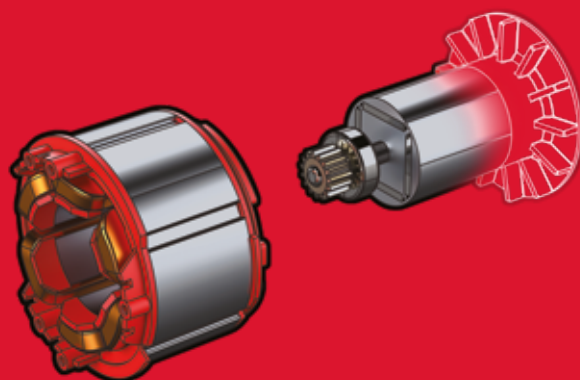

FUEL™ is engineered for the most demanding tradesmen in the world. FUEL™ delivers extreme performance in a compact structure and features three MILWAUKEE® exclusive innovations - the POWERSTATE™ brushless motor, REDLITHIUM™ battery pack and REDLINK PLUS™ intelligence hardware and software - that deliver incredible power, run time and durability.

Simply put, FUEL™ offers the best, full system technology that drives, protects and powers your cordless tools.

WHAT THE PROS SAY

PEBLEY BEACH - HYUNDAI

“Cordless against corded, it’s very much like Wi-Fi against plug-in networks, everyone’s going Wi-Fi nowadays, likewise with portable tools they have to be cordless. If you think about the cables running around the workshops and all the health and safety issues that brings, it’s just critical we don’t have that anymore. You can get into tight spots, you are not dragging an air line behind you and they’re not that heavy so it’s a bit easier on the wrist and arm when you’re trying to work at heights.”

Dominic Threlfall - Pebley Beach Hyundai

VIRGIN ATLANTIC ENGINEERING

“Virgin Atlantic Engineering love the Milwaukee M18 TAL-0 Task Area work light. It’s no fun working in a dark main landing gear bay or an APU bay with extension leads tripping you up, this light has proved to be perfect for any task our engineers have carried out on our fleet of Boeing and Airbus aircraft.

The versatile light that has never let us down. Build quality is first class, reliable and very robust, our engineers have very high standards but they’ve been really impressed with this work light.”

Jeff Morrison - Virgin Atlantic Engineering

ONE **TRANSPORT** CHOICE

DAF - FORD AND SLATER

“Historically technicians have always used pneumatic power tools, they have definitely moved away from that to battery powered tools. We don’t have to drape air lines and cables across workshop floors. There are less trip hazards so it makes it a lot safer environment within the workshop.”

Justin Hall - Ford and Slater

SONIC RAIL SERVICES

“Using the MILWAUKEE® M18™ platform has been a great advantage, as it means having the versatility of having multiple tools along with their batteries to hand when doing a task on site. Milwaukee’s M18™ GG grease gun, great bit of kit – no more air locks or cartridges flying out when reloading the gun! The adjustment that allows you to select the number of pumps required is a game changer, no more guessing or overfilling of grease.”

Attie VanBelkum - Sonic Rail Services

RAIL

BABCOCK

“Over the years we have had tools from all the major providers but Milwaukee tools have proven to be the best in filling our demand, both in versatility and durability. MILWAUKEE® offer a wide range of hand tools. Power tools and equipment, when it comes to cordless tools it is in a league of its own. We mainly use the M18 FUEL™ range of tools on site.”

James Marvin - Babcock

NAUTICAL

MULTIHOG

“Our increasing workforce needed the tools required to produce the quality product our customers demanded and deserved. The highest recommendation of all is that of our engineers. One tool in particular, the ½” impact wrench was very impressive, easily completing tasks the competition was struggling with.”

Niall Donnelly - Multihog

AGRICULTURAL

BMW MOTORRAD WORLDSBK TEAM

“We originally used a power cord or air line which was clumsy and heavy. We started using Milwaukee tools in 2015, the big gun is a lot smoother and doesn’t rattle as much as the old air guns. When we’re in a race situation flag to flag in the pits the race never gets stopped so when the bike comes in you have to get the wheels changed as quick as possible. The Milwaukee tools make this a lot easier to do.”

Ian Campbell - BMW MOTORRAD WORLDSBK TEAM
